

A 49-year old male...

showed a number of classic **magnesium deficiency signs**, but a standard blood test showed his magnesium was **normal**.

His Functional Health Report revealed he needed to maintain a higher dose of magnesium to remain healthy.

He increased his magnesium intake. Within days, his fatigue vanished, the dark circles under his eyes began to fade, his blood pressure lowered, his HDL levels rose, and his blood sugar control improved.

What critical health information are you missing?

Ask your healthcare professional for a Functional Health Report today.

A Functional Health Report takes your lab data and analyzes it to help you understand what's going on inside your body.

Like a finger print, people are individuals with unique biochemical characteristics. Even for people with the same condition, their contributing imbalances may be very different. That's why for optimal results, health decisions should incorporate understandable, actionable information about your biochemistry. That is exactly what The Functional Health Report does, so ask your health care provider for one today.

IMAGINE

if you could ask your body

WHAT'S GOING ON?

JANE DOE
49 year old Female - Born Nov 15, 1968

Lab Test on Apr 01, 2022

Blood Test Results Report

The Blood Test Results Report lists the results of the patient's Chemistry Screen and CBC and shows you whether or not an individual element is outside of the optimal range and/or outside of the clinical lab range. The elements appear in the order in which they appear on the lab test form.

Above Optimal Range 8 Current 13 Previous	Above Standard Range 5 Current 5 Previous	Alarm High 2 Current 1 Previous
Below Optimal Range 4 Current 6 Previous	Below Standard Range 0 Current 4 Previous	Alarm Low 0 Current 0 Previous

Element	Current	Previous	Impr	Optimal Range	Standard Range	Units
Glucose	63.00	90.00		72.00 - 90.00	65.00 - 99.00	mg/dL
Hemoglobin A1C	5.50	5.60		5.00 - 5.50	0.00 - 5.60	%
BUN	17.00	17.00		10.00 - 16.00	7.00 - 25.00	mg/dL
Creatinine	0.83	0.88		0.80 - 1.10	0.40 - 1.35	mg/dL
BUN/Creatinine Ratio	20.48	19.31		10.00 - 16.00	6.00 - 22.00	Ratio
eGFR Non-Afr. American	69.00	65.00		90.00 - 120.00	60.00 - 90.00	mL/min/1.73m2
eGFR African American	81.00	76.00		90.00 - 120.00	60.00 - 90.00	mL/min/1.73m2
Sodium	138.00	137.00		135.00 - 142.00	135.00 - 148.00	mEq/L
Potassium	3.90	4.20		4.00 - 4.50	3.50 - 5.30	mEq/L

Then ask your healthcare practitioner for a Functional Health Report today.

Your Functional Health Report works by analyzing results from your lab data. It identifies your body's unique biochemical patterns and makes specific, scientifically based recommendations. So you:

- ☐ **Understand your nutritional deficiencies** and which supplements could help you.
- ☐ **Save time and money** by purchasing only what your body needs.
- ☐ Enjoy **peace of mind** that you are not accidentally harming yourself.

Personalized Information = Better Decisions

- ☐ You want to address an **existing health concern or condition**
- ☐ You want to **optimize athletic performance**
- ☐ You want to **reduce medications**
- ☐ You want to **overcome an addiction**
- ☐ You want to **get pregnant**
- ☐ You want to **increase vitality**
- ☐ You're at **high risk of disease**
- ☐ You simply **want to feel better!**

Explains what your lab results mean and relates each recommendation back to specific biochemical imbalances.

An early warning system identifying imbalances when they are meaningful, not just critical.

Ranks imbalances so you can focus on what is most important; recommends further testing based on your current lab results; and provides special alerts where your lab results may require special attention.

Tracks results to see how well your treatment is working.

Identifies your body's unique biochemical pattern and makes specific, scientifically based recommendations.
